

## PROJECT OVERVIEW TRAVELLO.ORG

### THE SCOPE:

- Development and Design of the portal.
- All interfaces as desired by you.
- Full testing of the website.
- Prepare relevant documents if felt necessary.
- Provide the administrative interface

### PORTAL SECTIONS & FUNCTIONALITY

We will Design a homepage for the portal with a sleek and corporate look. We will have Home Page where user can view the basic information about our Portal. We will also have different common links like: About us, Contact us, Our Team, etc.

On Homepage, User will get 2 options

1. Registration, for new users
2. Login, for registered users.

#### **1. Registration:**

Doctors (User) will be able to register with us by filling the registration form with the following fields.

- Title
- First Name
- Middle Name
- Last Name
- DOB
- Country: Drop Down
- State: Drop Down (auto filled once country is selected)
- City: Drop Down (auto filled once State is selected)
- Contact Number

- 
- Email ID
  - Alternate Email ID
  - Professional Area Drop down
  - Qualification: Degree / Drop Down
  - Specialty: Drop Down
  - Passport Number
  - Shortlisted Conference Details
  - CV attachment
  - Declaration on grants / sponsorships

After user fills the form and click submit, We will register him/her on our system and an Verification Email will be send to the user to verify his/her Email id. Once, user clicks on the link of the verification email. We will authorize the user to access his/her Dashboard.

If needed, we can verify user's mobile number by sending the verification Code through SMS.

## **2. Login:**

On this Screen, the registered user will be able to login using their email address and password.

User can also click Forgot Password, in case he/she doesn't remember he password. In that case, the user will provide their email Id and we will send them the link to reset their password.

## **3. Dashboard:**

When the user successfully log in to the system, they will be redirected to their Dashboard, where they can view their personal details, booked events, etc.

Other then this, We will provide them with Buttons like "Edit Profile" from where they can edit their personal details. "Event Booking" Button, from where they can book any conference. Etc.

## **4. Edit Profile:**

When the user clicks the "Edit Profile" button from the dashboard, they will be redirected to this page, where they can modify their personal details.

## 5. Event Booking:

When the user clicks "Event Bookings" button from the dashboard, they will be redirected to this page. Here they will be able to view their previous events booking. They will also be able to add new Event by click the "Add Event" button provided on this page.

## 6. Add Event:

On this page the user will be able to add new event booking. They have to fill in the below form

1. **Specialty:** Select from drop down list
2. **Conferences:** This drop down will be filled once user selects the specialty. The drop down will also have an option "Other". If user does not find the required conference in the drop down, he can select other, where they will be able to enter the name of the conference in the text box.
3. **Dates:** If user select any conference from the above drop down, the start date and end date of the conference will be filled in the date box provided, user can edit it. If user selects "Other" they have to manually enter the dates.
4. **Support needed:** Here the user will be asked what support they need from our side.  
Like
  - a. Registration
  - b. Travel Assistance
  - c. Stay
  - d. Local Logistics

This will be a multiple selection options. (User needs to select at least one option)

5. Last will be the confirmation of our term and condition where the user will have to click the checkbox saying "I Agree some fixed text....."

Once user has filled in all the details, they can click "Save" button to book that event. After booking the event the user will be redirected to the View Event page where they can view all the booked events.

## 7. Edit Event:

When the user wants to edit any of the booked events, they can click on the event name from the list of events in their book event page. On clicking the link they will be redirected to the edit event page, where they can make changes in the event booking and save the changes.

## **ADMINISTRATIVE INTERFACE**

Administrative interface will be for the admin and staff of the portal. All the accessible modules by the logged in user will be easily available from the navigation bar.

### **1. Login:**

Here the Admin User will login using their credentials; we will have User-Module Access, where each user will have access to certain or all modules.

We will have 2 levels of users say Administrator / Normal User (This can be increased)

Administrator user will have all the rights by default. Administrator user can Create new Users and assign them rights to different Module.

### **2. Masters: (Add / Edit)**

In this module the Admin user can view the entire list of different Masters added so far in the system. User can Add new or Edit the existing one.

List of master:

- City Master
- State Master
- Country Master
- Professional Area
- Qualification
- Specialty
- other if needed

### **3. Conferences: (Add / Edit)**

In this module the Admin User can view the entire list of Conference added so far in the system. User can Add new or edit the existing one

Add Conference Form will have the following fields:

- Name of the Conference
- Conference start date

- 
- Conference End date
  - Url of the details page:
  - Activate from date (this is the date from when the conference will be active on our portal)
  - Activate To date (this is the date till when the conference will be active on our portal)

Please provide what other details you need to store in the database.

#### 4. **Doctors Details:**

In this module admin user can view registered doctor's details. We will have different links and button in the list to do different task like view booked events of a particular doctor, send email, send SMS, etc

#### 5. **Booked Events:**

In this module admin user can view the list of booked events by all the doctors. We will have links in this list to navigate to different module like doctor's details, conference details, specialty list, etc

#### 6. **Doctor-Event List:**

This is the module where we can see list of booked events of a particular doctor, the link to this page will be in the Doctor's Details list.

#### 7. **Event-Doctor List:**

This is the module where we can see list of doctors for a particular event, the link to this page will be in the Booked Events list.

#### 8. **User Module:**

This is the module where the Administrator will Add / Edit User details. From this the Administrator can assign User's rights to different Module

#### 9. **Report Module:**

In this we will create all the available report for different users as per their rights

---

### **APPLICATION TECHNOLOGY:**

We will be using technologies like

Application	: HTML, PHP, AJAX, JQuery, CSS
Database	: MySQL Server
Development Tools	: Adobe PhotoShop, Macromedia Dream weaver

### **TIME FRAME:**

Total Man-days estimated for the project [after the receipt of all the content]: 40 working days.

### **CLIENT INTERACTION:**

We request the client to nominate a representative who co-ordinates with us to facilitate quick and timely execution of the project. In the initial stages, quick approvals and decisions are mandatory. The Client contact helps to ensure all inputs are received quickly so time and dates can be met.

### **PROJECT INVESTMENT:**

The total estimates for the project based on the above-mentioned sections, functionality and assumptions is Rs. 64,000/- only. (Rupees sixty four thousand only)

For the Complete design and development of the portal including all the sections, features and functionalities mentioned above.
